The Hall

FORGED ALL ALUMINUM LEVEL

the level that tops them all! Leading the level field has been a Hall habit for more than 25 years . . . a habit that continues to pay dividends to the many dealers stocking and selling the complete line of Hall levels.

Constructed of rigidly *forged virgin aluminum* frames, the Hall level easily withstands the strains of expansion and contraction resulting from extreme changes in temperature.

The Hall Forging Process assures maximum strength and resistance to corrosive elements while furnishing a high lustre finish that is tops in customer eye appeal.

*A folder
of the Hall line
will be mailed
on request.*

FORGED all aluminum levels by Hall carry top honors for customer satisfaction. Because forging gives the frame extra strength — extra resistance to corrosive elements, Hall levels have a longer useful life. Hall's Forging Process also eliminates the possibility of concealed defects — reduces strain produced by extreme temperature changes.

Thirty-five years of manufacturing experience behind each Hall level guarantees accuracy and dependability on the job. *Remember there's a Hall level for every job.*
